

WORKSPACE / OVERVIEW

Every rupee, in focus.

Estimates, invoices, recurring billing, expenses, projects, time and reports - one calm workspace.

THE PROBLEM

Billing chaos costs small businesses money.

Four leaks we hear from owners every week.

Scattered paperwork

Estimates in email, invoices in...
spreadsheets, nothing linked.

Late follow-ups

No view of what is awaiting,
overdue, or ready to convert.

Invisible receivables

Nobody knows the outstanding
balance by age - cash surprises.

Leaking billables

Expenses and billable hours
never make it onto invoices.

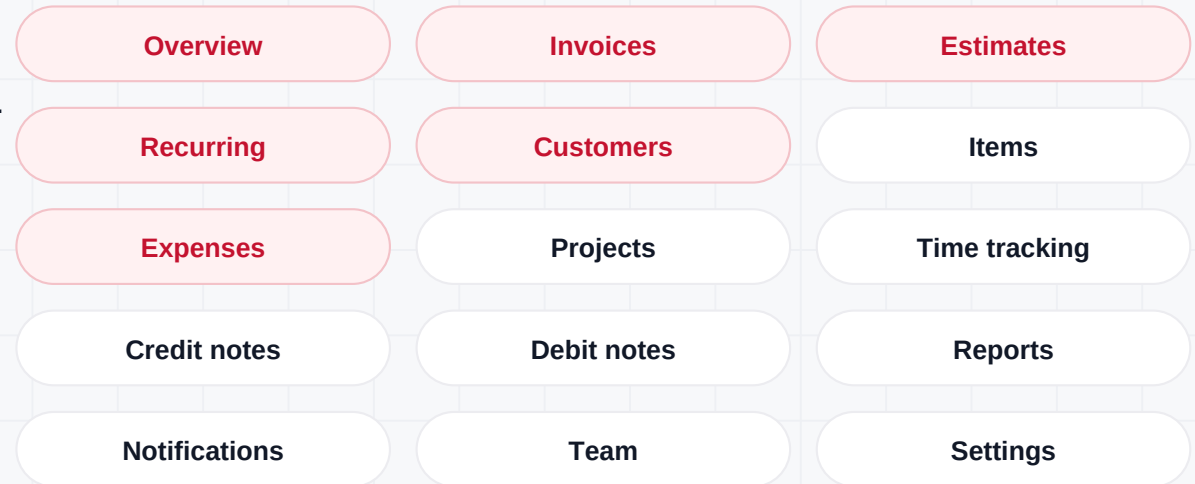

Result: delayed collections, write-offs, and tax-time panic.

THE SOLUTION

One workspace for the whole money trail.

15 modules, one login, zero re-typing.

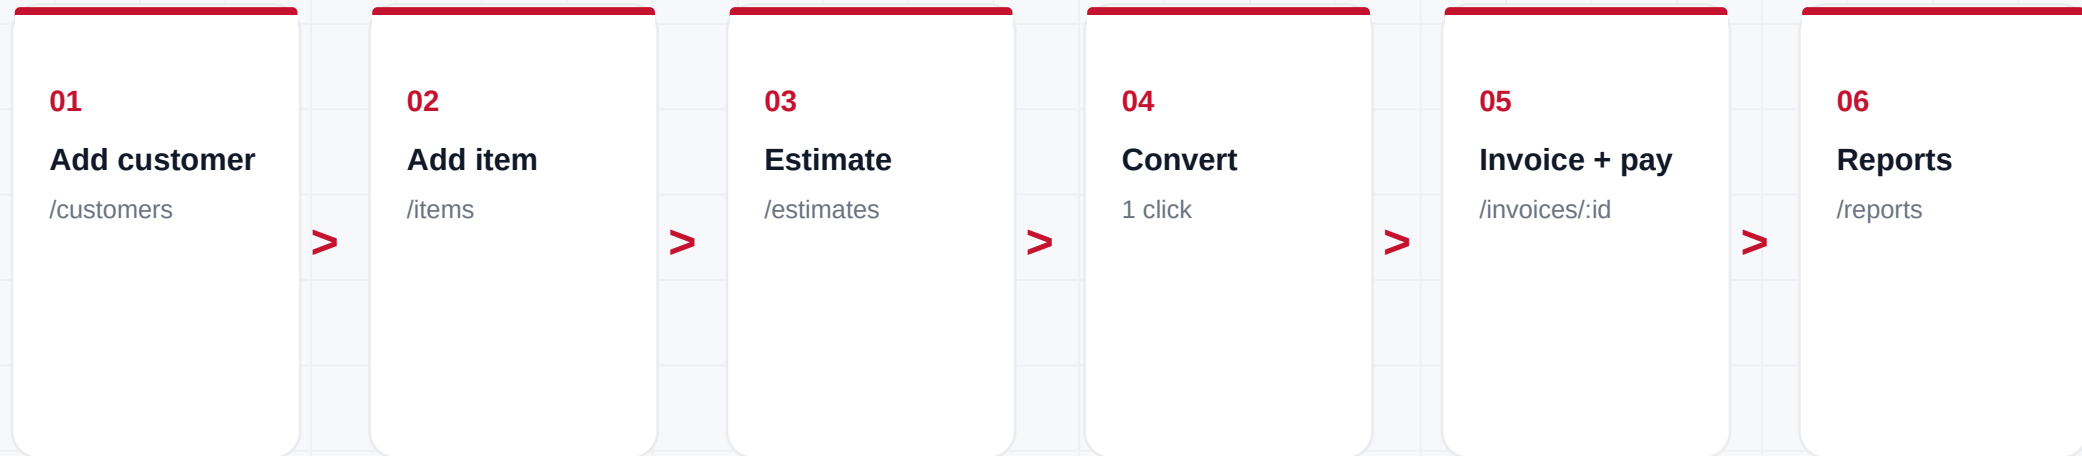

- Estimate to invoice in one click - scope never gets re-typed.
- Every payment, expense and hour rolls into live reports.
- INR-first with paise-accurate totals and GST-ready taxes.

HOW IT WORKS

From first customer to collected cash in 6 steps.

The exact demo path - every step is one click from the last.

Quick actions and the red + Create menu keep the next step one tap away, everywhere.

Propose, get a yes, and bill - without rework.

Estimates

Send sharp proposals with validity dates and GST lines.

1-click convert

Accepted? Convert EST to INV instantly - lines carry over.

Recurring billing

Weekly to yearly schedules, Net terms, auto next-run.

Demo illustration (verified run): EST-0001 Rs.17,700 --> INV-0001, same lines, same totals.

Collect every rupee - including partial payments.

- UPI, Card, Netbanking and Cash at collection.
- Part-payments tracked: paid vs balance always visible.
- Overdue and open invoices feed the dashboard automatically.

INV-0001 - demo illustration

Total	Rs.17,700
Paid (UPI)	Rs.5,000
Balance	Rs.12,700

partial

Billable spend and hours stop leaking.

EXPENSES

Rs.850 billable

Software, tagged to customer

PROJECTS

Budgets in minor unit

Fixed / Hourly / Retainer

TIME TRACKING

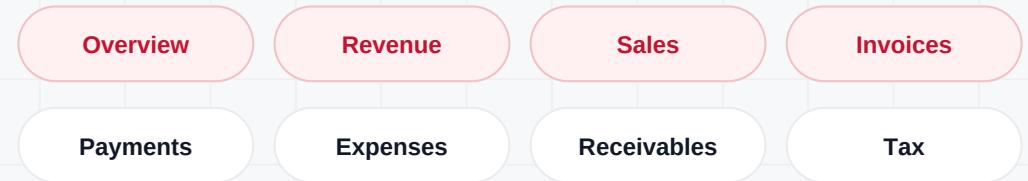

Timer + manual entries

Billable hours to amount

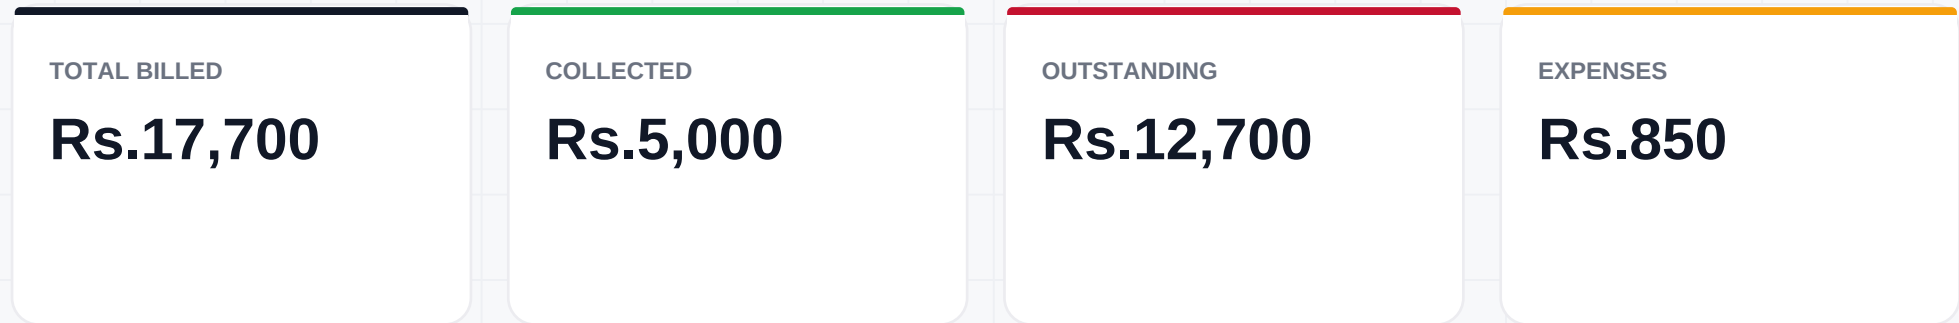

Billable expenses and hours sit ready to be added to the next invoice - nothing forgotten.

Adjustments and answers, all in one hub.

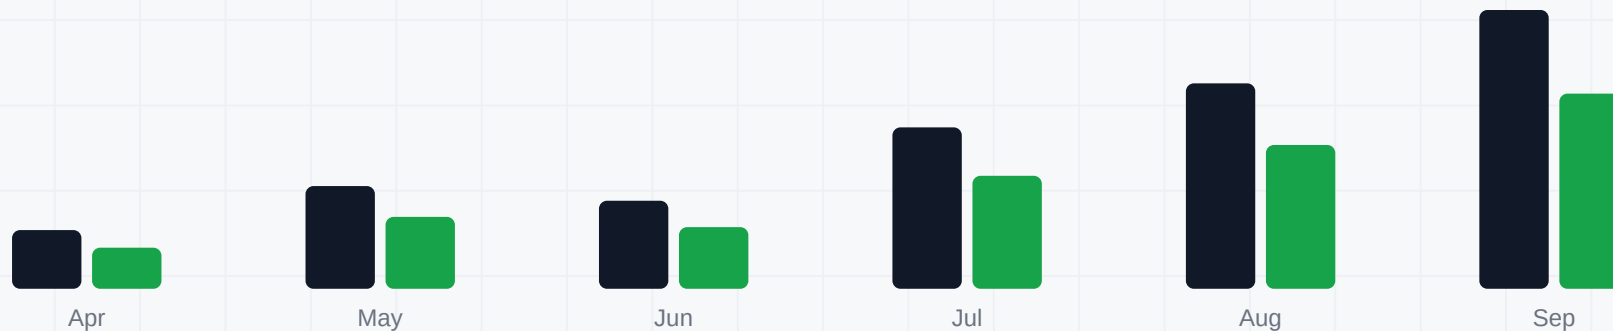

- Credit & debit notes linked to source invoices with reason + tax.
- Reports hub: 8 tabs with date-range and customer filters.
- Receivables aging by 0-30 / 31-60 / 61-90 / 90+ days.

The Financial Overview owners open every morning

Cash flow (demo illustration)

Dark = billed Green = collected + quick actions: New invoice / estimate / customer / expense.

Your books stay yours - and your team stays in sync

Workspace isolation

JWT sessions scoped per organisation. Your data only.

Roles & team

Admins and agents with clear workspace roles.

Activity feed

Invoice created, payments, schedules - all notified.

Settings control

Business + GST profile, numbering, taxes, modes.

Offline-tolerant UI with honest empty states - the app never shows a blank screen.

PLANS & START

Start free. Grow when collections grow.

Pricing mirrors the in-app plan catalogue - 14-day Pro trial included.
